

wherein X is oxygen or sulfur;

wherein R is selected from the group consisting of (a) C<sub>1</sub> to C<sub>12</sub> alkyl moieties that are terminally substituted with zero to three halogen atoms and (b) C<sub>5</sub> to C<sub>7</sub> aryl groups substituted with zero to four alkyl, haloalkyl, or alkoxy moieties;

wherein Z<sub>1</sub> is a moiety selected from the group consisting of aryl, aralkylene, dialkylamino, diarylamino, alkylarylamino, trialkyleneamino, cyclic amino, cyclic amido, cyclic imido, and oxy derivatives thereof; and

wherein Z<sub>2</sub> is a moiety selected from the group consisting of aryl, aralkylene, dialkylamino, diarylamino, alkylarylamino, trialkyleneamino, cyclic amino, cyclic amido, cyclic imido, and oxy derivatives thereof.

---

**Remarks:**

The above amendment is made not for purposes related to patentability, but to correct a typographical error in that the R moiety may be selected from the group comprising, in part, C<sub>1</sub> to C<sub>12</sub> alkyl moieties, not C<sub>1</sub> to C<sub>2</sub>. Support for this amendment is found at lines 2-4 of page 17 of the original specification. Thus, no new matter has been added.

Respectfully submitted,

Date: February 17, 2003
